Triage

Do / Say / See

Choose review work, inspect its reason and action, and connect a Slack digest to the review queue.

5 pillars | 18 core pages | limit 25

The browser recording uses Mike (malonemike688-gh), reviewing Mahesh's flagship PR #4 in coderabbit-demo. The Slack digest is a separate example from Mahesh's account.

Read each grouped step top to bottom. Do contains the clicks and scrolls; read only Say aloud. See is a frame from the delivered video. Times refer to that video. The narration is preserved in full, including the recorded opening and closing.

Creation, Send and approval actions describe the recorded flow. Rehearse with the linked existing results; use a separate training run when repeating those actions. Live pages may have changed. Resource links require the corresponding account access.

OPEN THE DEMO

Triage queue

Flagship PR #4

PR #4: Change Stack

PILLARS AND PAGE LIMITS

Introduction - 1 page

Open Triage - 3 steps / pages

My Action - 4 steps / pages

Read the Why - 3 steps / pages

Act from Card - 3 steps / pages

Queue to You - 4 steps / pages

The core count includes the opening page when present. This cover, operator prompts and resource directory are outside the core. Every pillar uses at most four grouped steps.

INTRODUCTION / OPENING / 00:00-00:23

Introduce the flow

DO

Show the section’s flow slide. Keep the full slide visible and highlight each pillar as it comes up in the introduction.

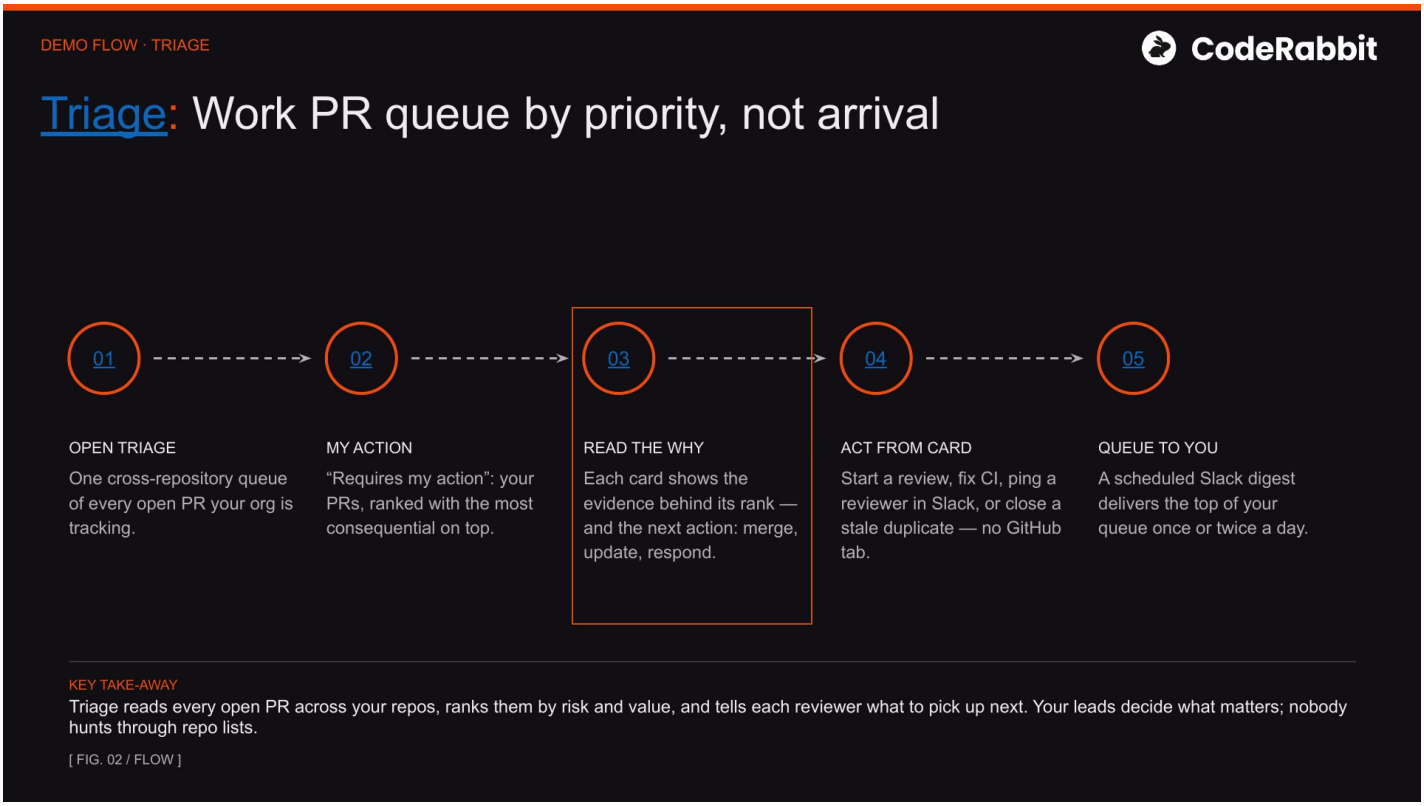

At the end of the introduction, switch to the first demo screen.

Slide deck

SAY

When several pull requests are waiting, I need to decide where to start. I'll open Triage, narrow the queue to the work that needs my action, and read the reason behind a recommendation. Then I'll use the card to open a detailed review. We'll also look at the Slack digest, which brings the queue into the team's conversation and gives me a place to pick up the next review.

SEE / VIDEO FRAME AT 00:09

OPEN TRIAGE / STEP 1 OF 3 / 00:24-00:38

Open and search the queue

DO

Open Triage in Mike’s reviewer account. Select coderabbit-demo and click All PRs.

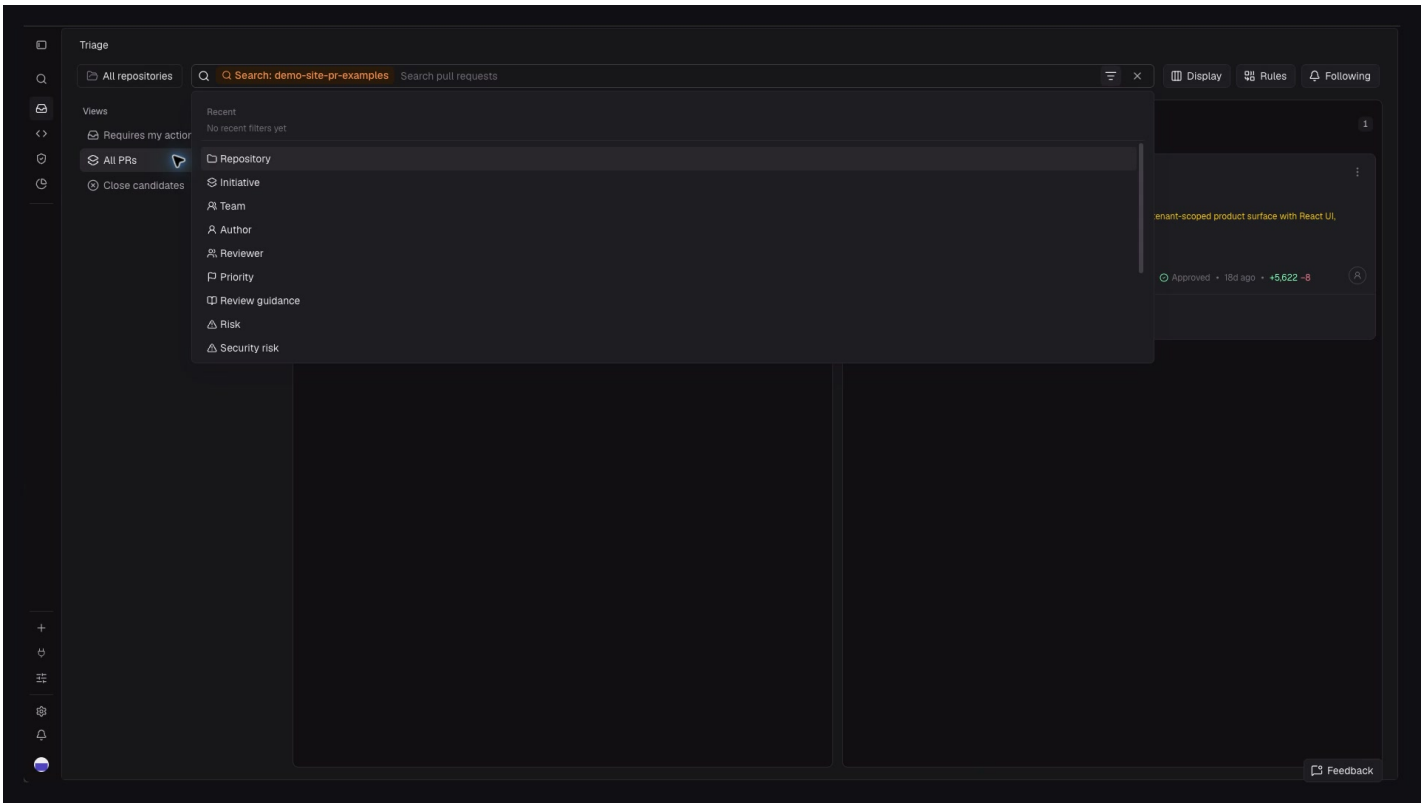

Click search and enter demo-site-pr-examples.

Triage queue

SAY

I open Triage to see pull requests across the repositories available to this account. I'm looking for our checkout and invoice change. I check the repository, pull request number, and title before opening it, so I know I'm following the right example.

SEE / VIDEO FRAME AT 00:36

OPEN TRIAGE / STEP 2 OF 3 / 00:39-00:51

Identify the PR

DO

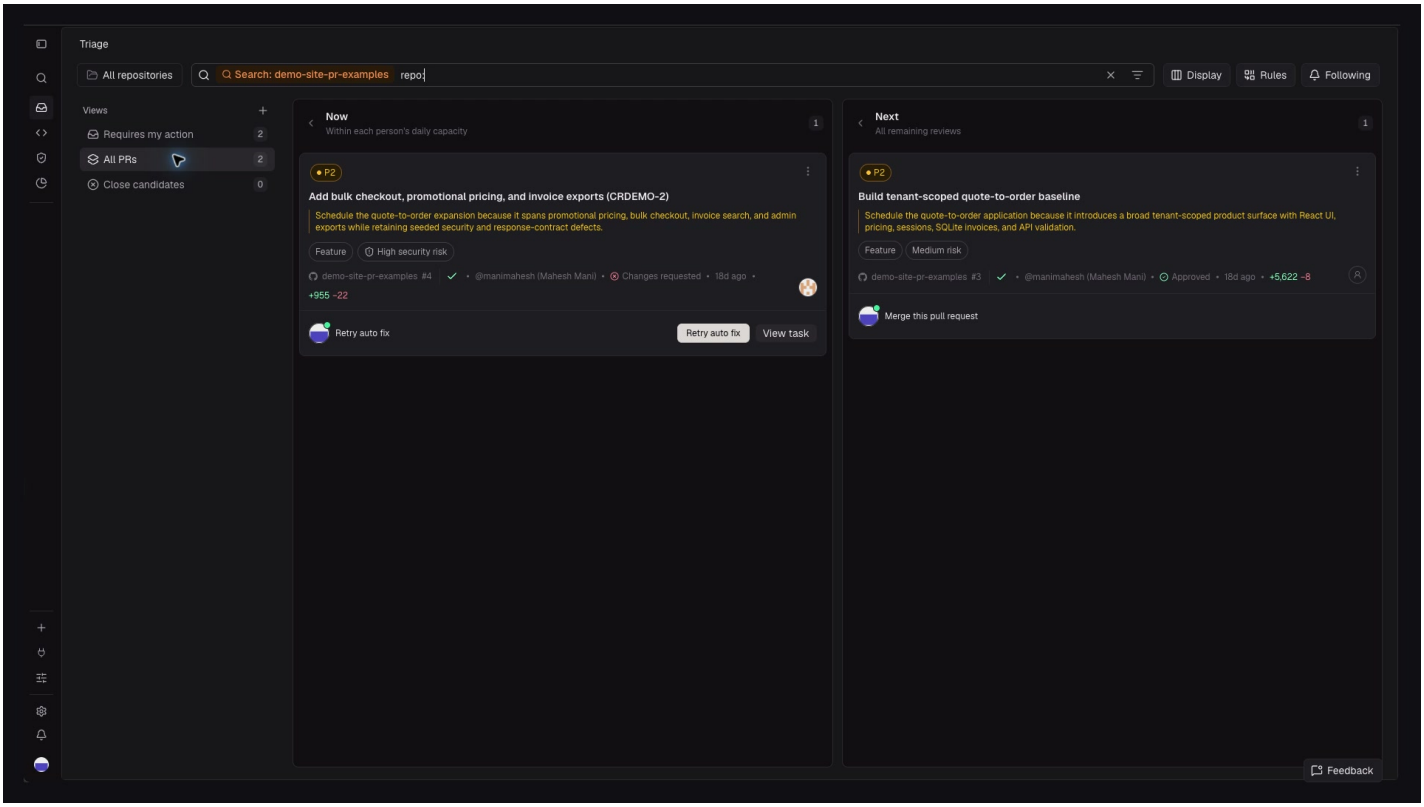

Locate PR #4. Read its repository, title, author, review state and checks before opening it.

Flagship PR #4

SAY

This change introduces promotional pricing and invoice features. We already have two questions to investigate. Whether customers can see only their own invoices and whether the discount applies at the correct quantity.

SEE / VIDEO FRAME AT 00:48

OPEN TRIAGE / STEP 3 OF 3 / 00:52-00:58

Read what needs attention

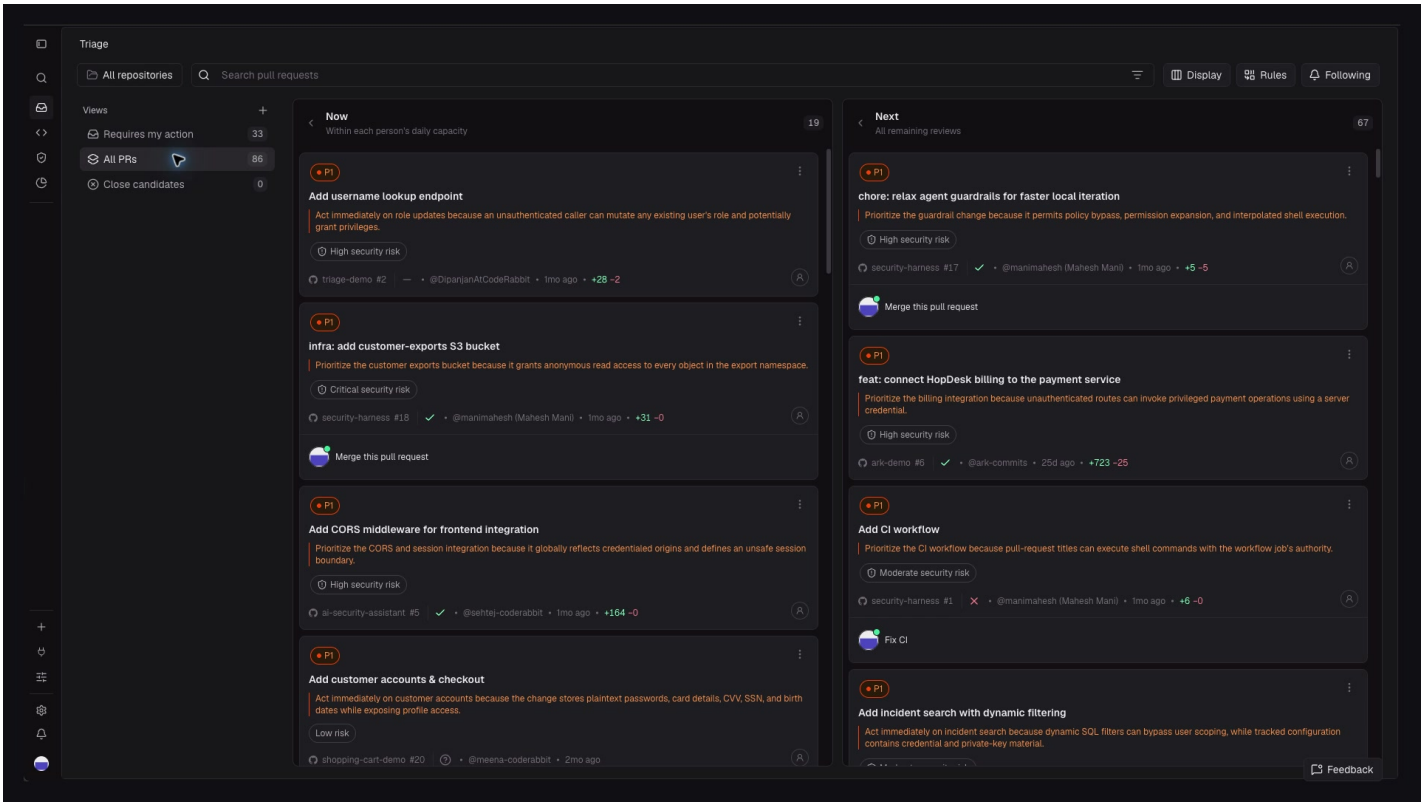

DO

Keep the PR card centered. Scroll enough to see its next-action line.

SAY

The queue gives me a view of the work waiting for attention. I'll narrow it to my responsibilities before deciding where to begin.

SEE / VIDEO FRAME AT 00:57

MY ACTION / STEP 1 OF 4 / 01:00-01:05

Select your action queue

DO

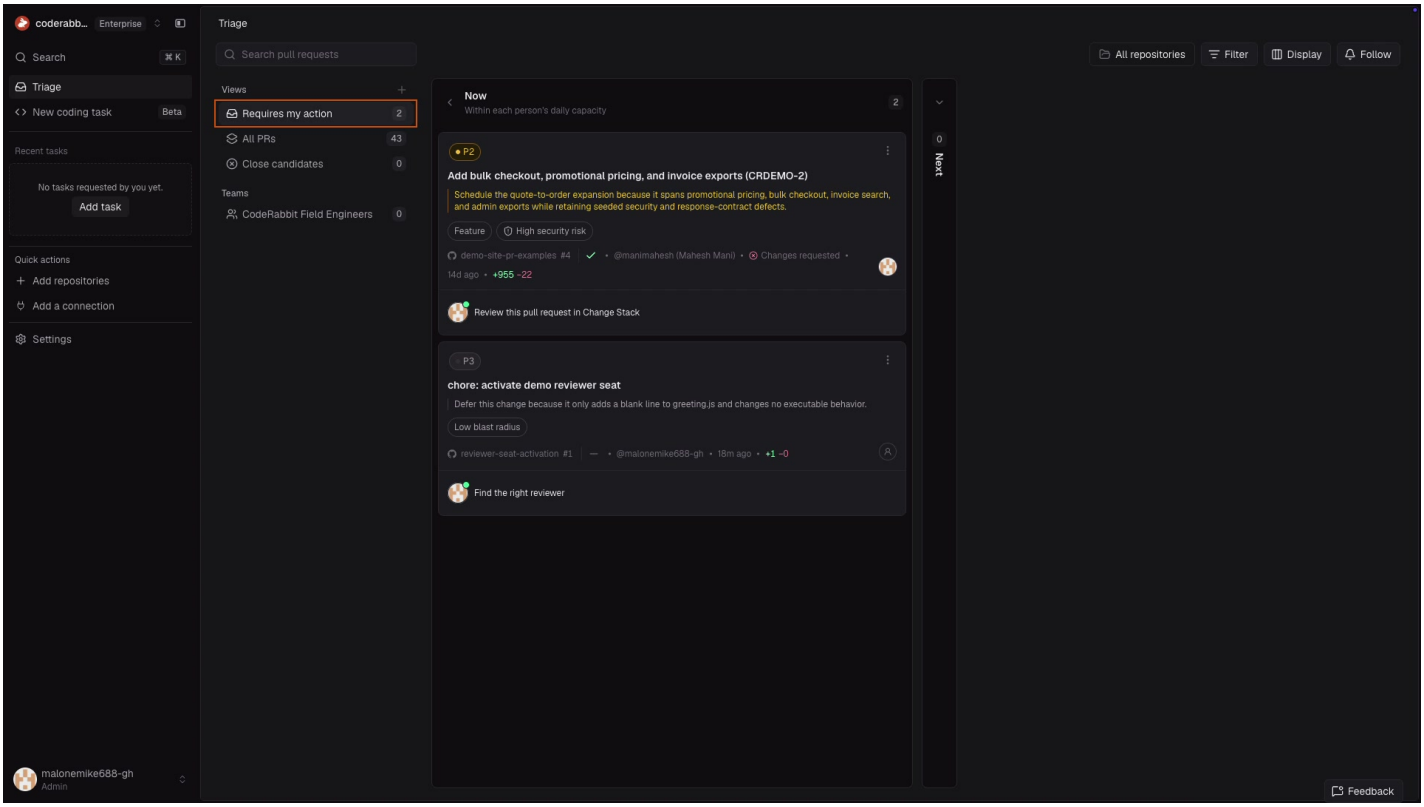

Click Requires my action in the queue navigation.

Triage queue

SAY

I select Requires my action, which brings together pull requests involving me as an author or reviewer.

SEE / VIDEO FRAME AT 01:04

MY ACTION / STEP 2 OF 4 / 01:06-01:15

Find the reviewer example

DO

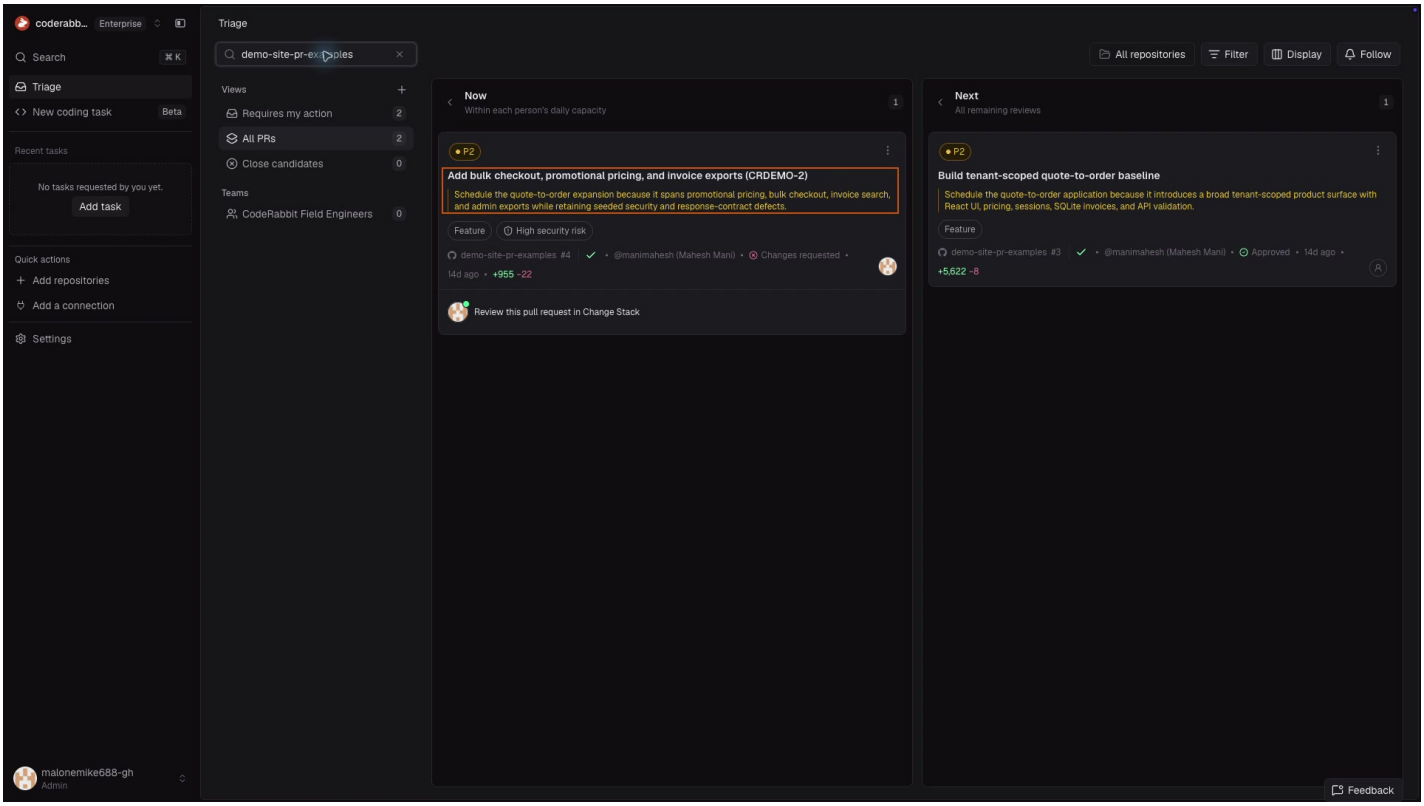

Keep demo-site-pr-examples in search and locate PR #4.

Check the reviewer context; Mahesh is the author in this recorded example.

SAY

For this part of the demo, I'm using Mike's reviewer account. I search for the demonstration repository and find the checkout and invoice pull request.

SEE / VIDEO FRAME AT 01:12

MY ACTION / STEP 3 OF 4 / 01:15-01:26

Read your responsibility

DO

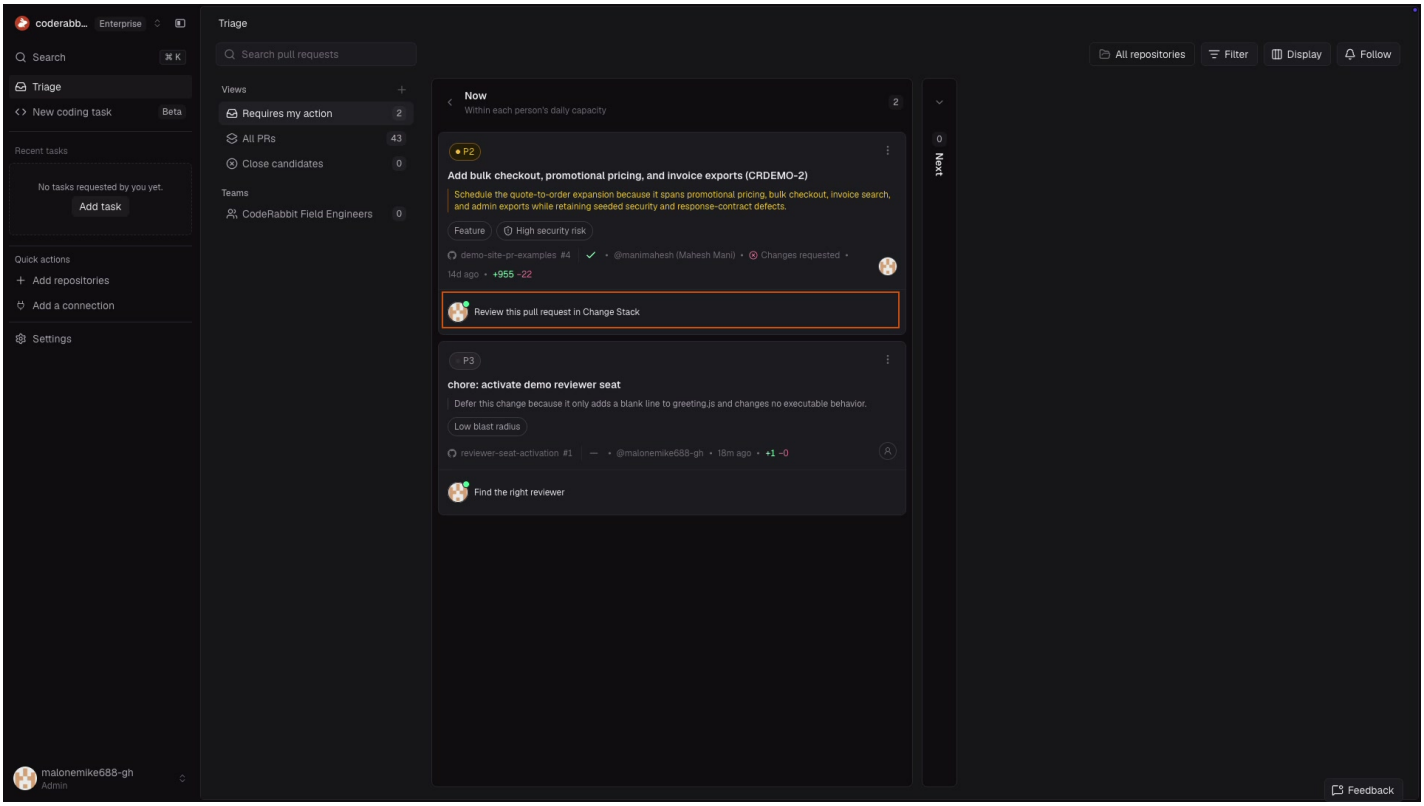

Scroll to Review this pull request in Change Stack on the card.

Leave it unclicked while explaining the reviewer's next step.

SAY

As the reviewer, my job is to examine the proposed behavior and the response to feedback. If the code needs to change, the author can prepare an update for another review.

SEE / VIDEO FRAME AT 01:24

MY ACTION / STEP 4 OF 4 / 01:28-01:34

Show the wider queue

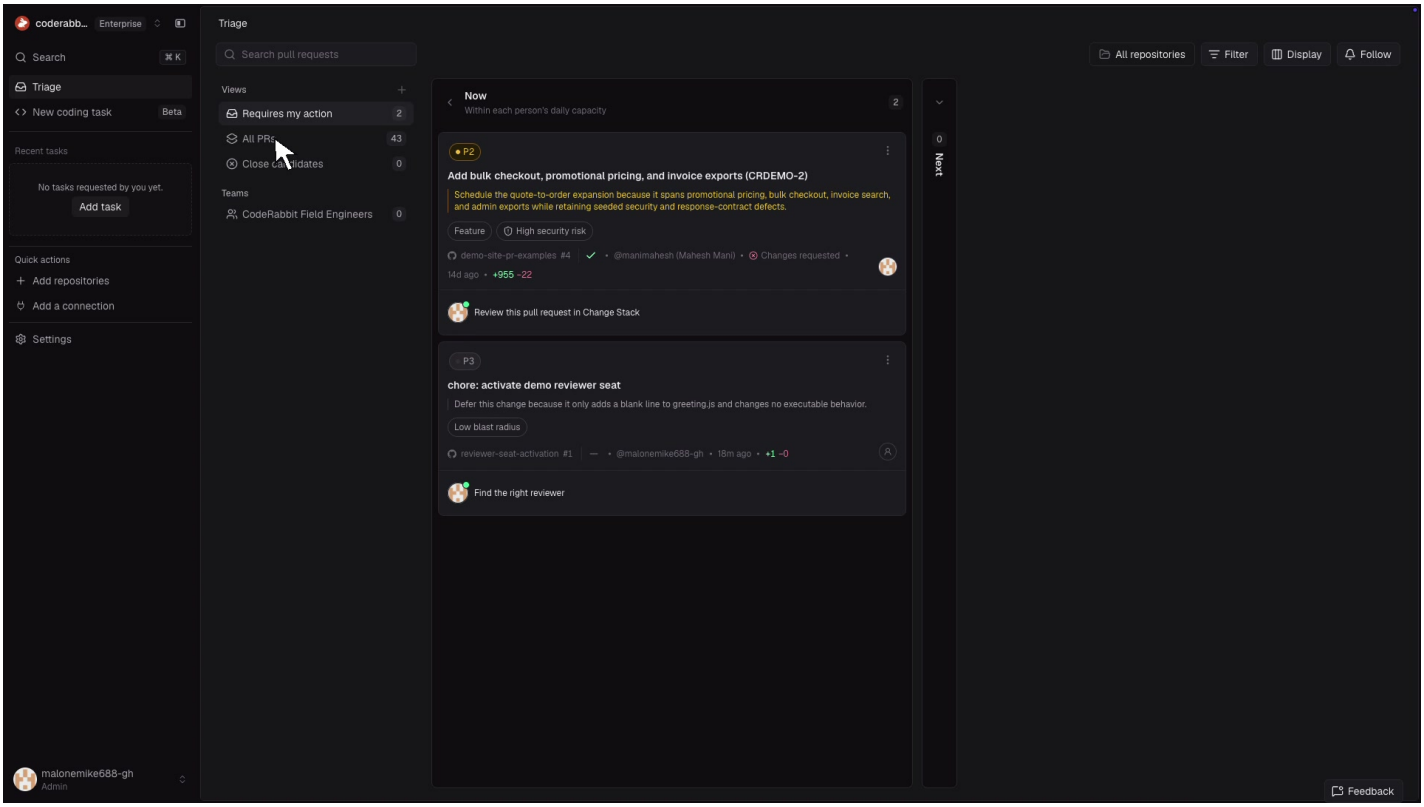

DO

Click All PRs to show the broader queue. Return to Requires my action to continue the reviewer flow.

SAY

The search keeps this example in view. I can return to All PRs whenever I need to see the wider queue.

SEE / VIDEO FRAME AT 01:33

READ THE WHY / STEP 1 OF 3 / 01:35-01:50

Open the priority reason

DO

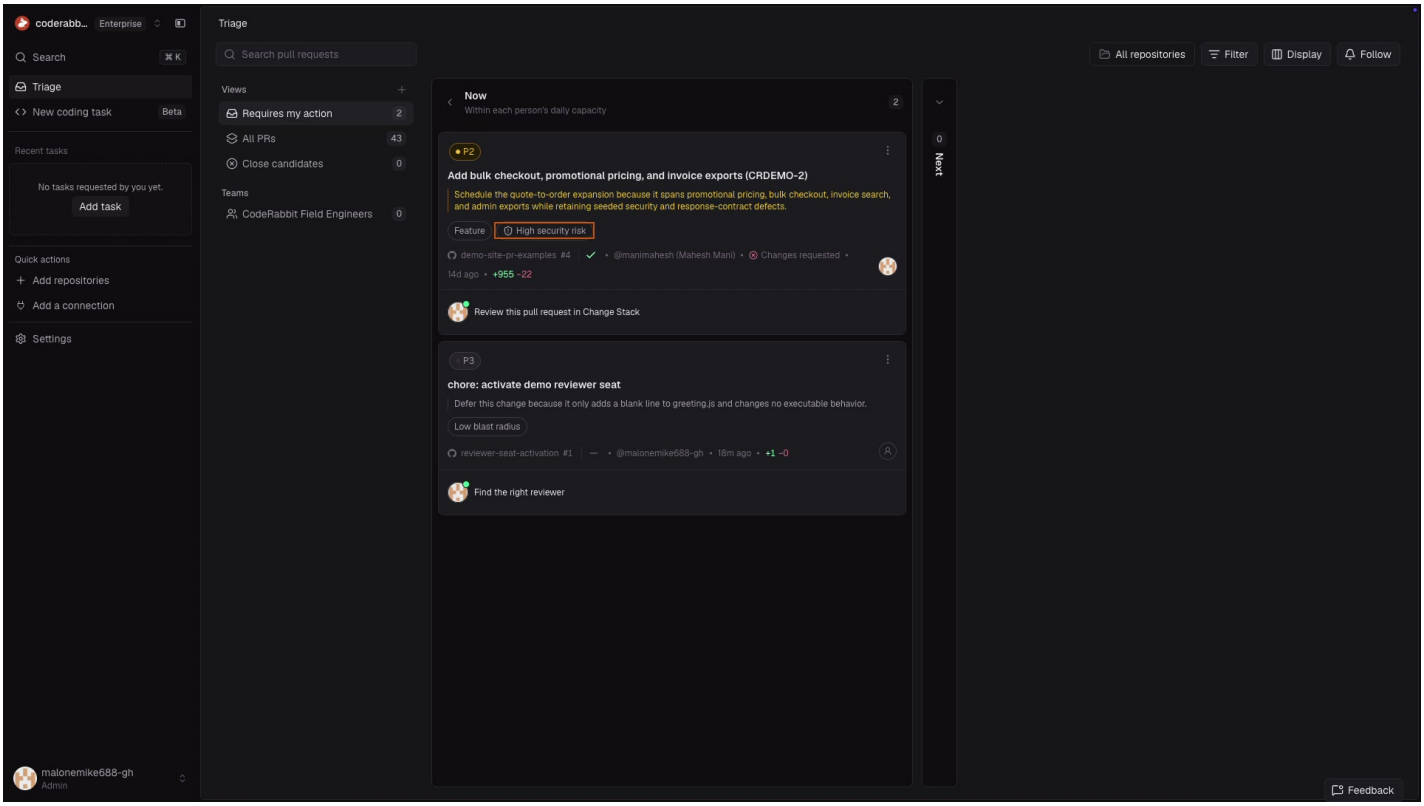

Click the card’s three-dot menu, then View priority reason.

Read the priority explanation and distinguish its priority label from High security risk.

SAY

I open View priority reason from the card to see why this pull request needs attention. This example is P2, Medium priority, and it also shows High security risk. Those labels describe different things.

SEE / VIDEO FRAME AT 01:48

READ THE WHY / STEP 2 OF 3 / 01:51-02:07

Inspect the risk evidence

DO

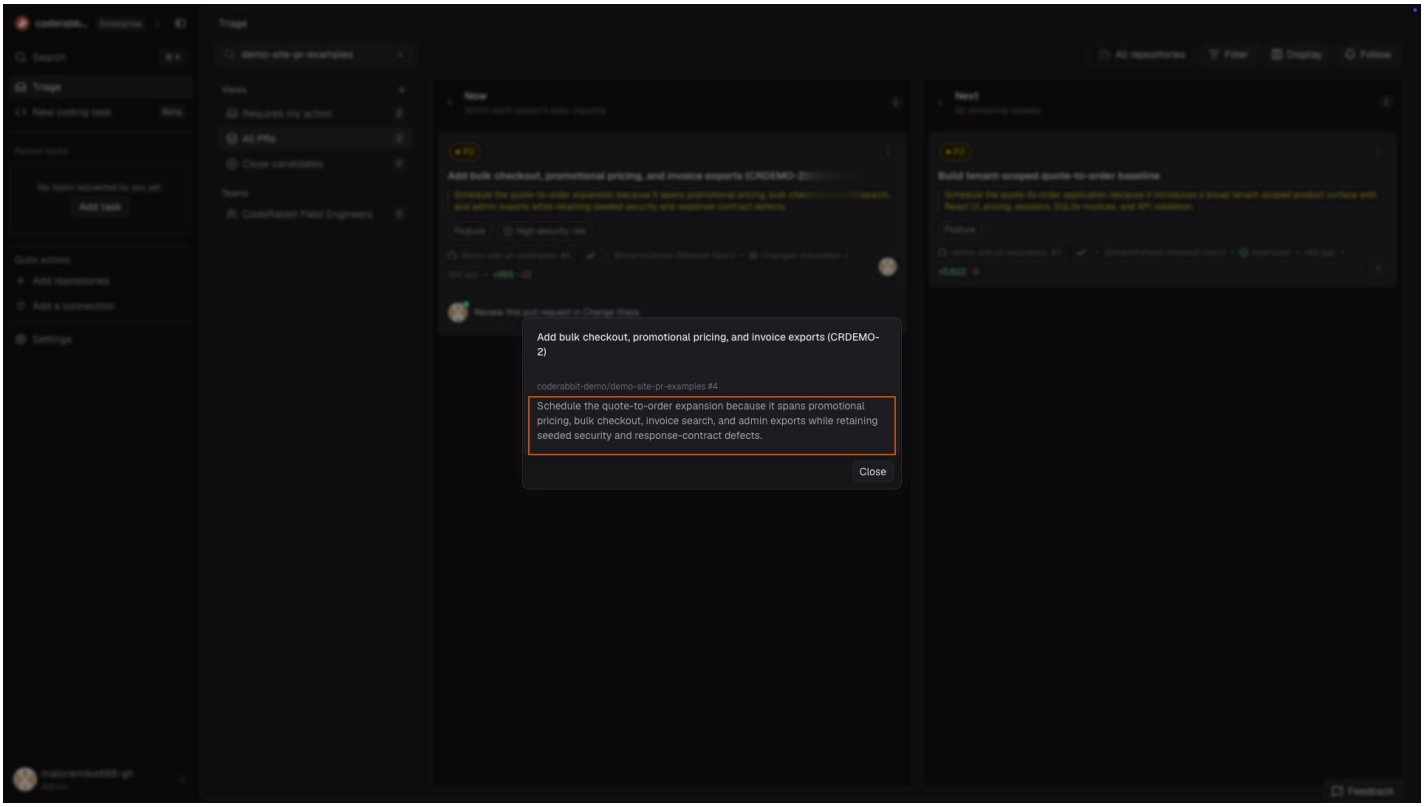

Click outside the menu. Hover High security risk to show its explanation.

Hold the tooltip and PR title in view while describing the customer-data boundary.

SAY

Queue priority helps me compare work while the security risk tells me about a concern within this change. The explanation points to security issues and problems with the data the change returns. I can use that reasoning to decide what to inspect first.

SEE / VIDEO FRAME AT 02:05

READ THE WHY / STEP 3 OF 3 / 02:08-02:23

Choose the investigation order

DO

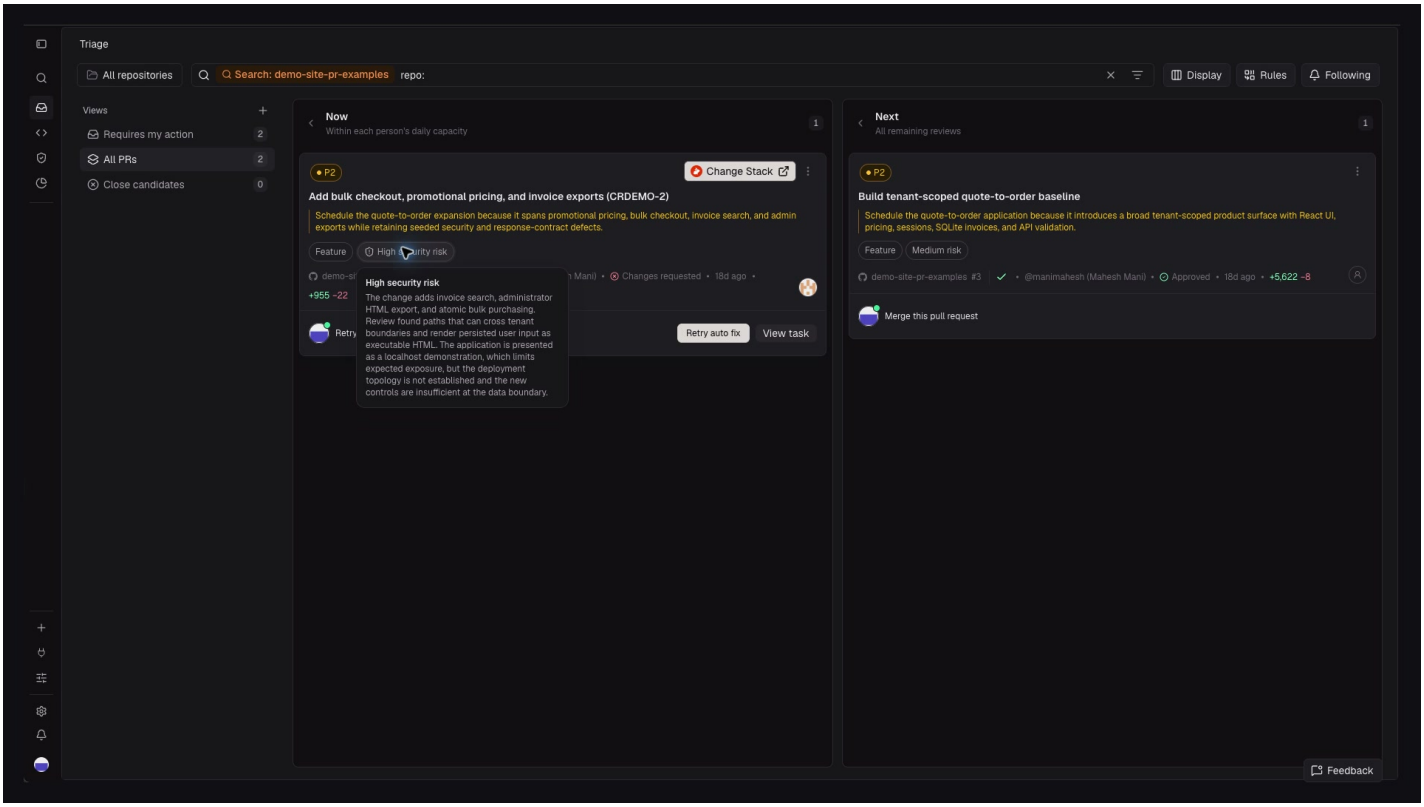

Dismiss the tooltip and keep the PR card visible.

Explain the SQL finding and discount boundary without claiming the queue always ranks every security issue first.

SAY

Here I'd start with invoice search because it could expose another customer's data. The discount boundary also matters and we'll inspect that as we review the code. I now have a reason for choosing this pull request and a specific question to investigate.

SEE / VIDEO FRAME AT 02:16

ACT FROM CARD / STEP 1 OF 3 / 02:24-02:32

Inspect available actions

DO

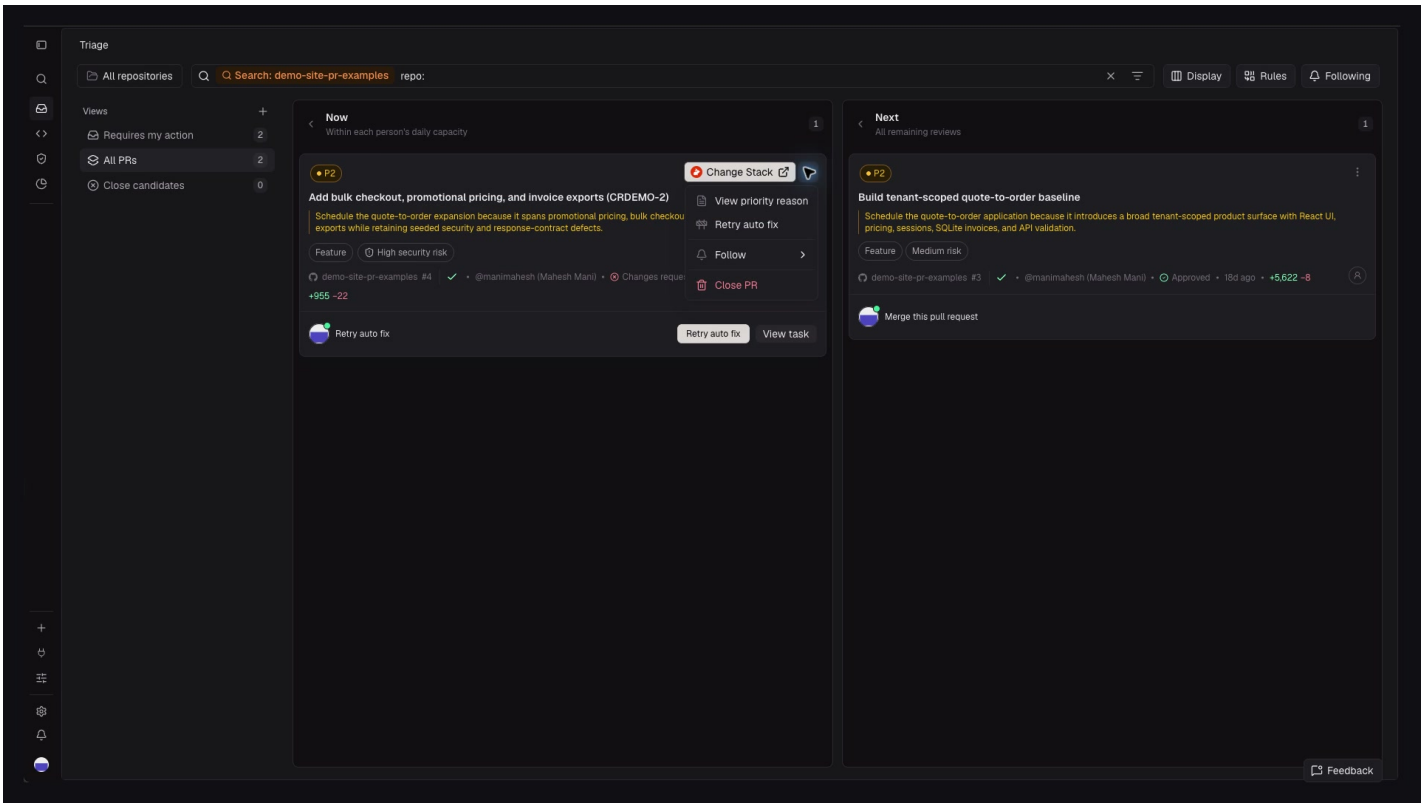

Open the three-dot menu and show View priority reason, Follow and Close PR.

Click outside to dismiss it; leave the PR open.

SAY

I return to the card and open its action menu. The available actions sit alongside the recommendations so I can see how to move the work forward.

SEE / VIDEO FRAME AT 02:31

ACT FROM CARD / STEP 2 OF 3 / 02:34-02:45

Inspect checks and requested changes

DO

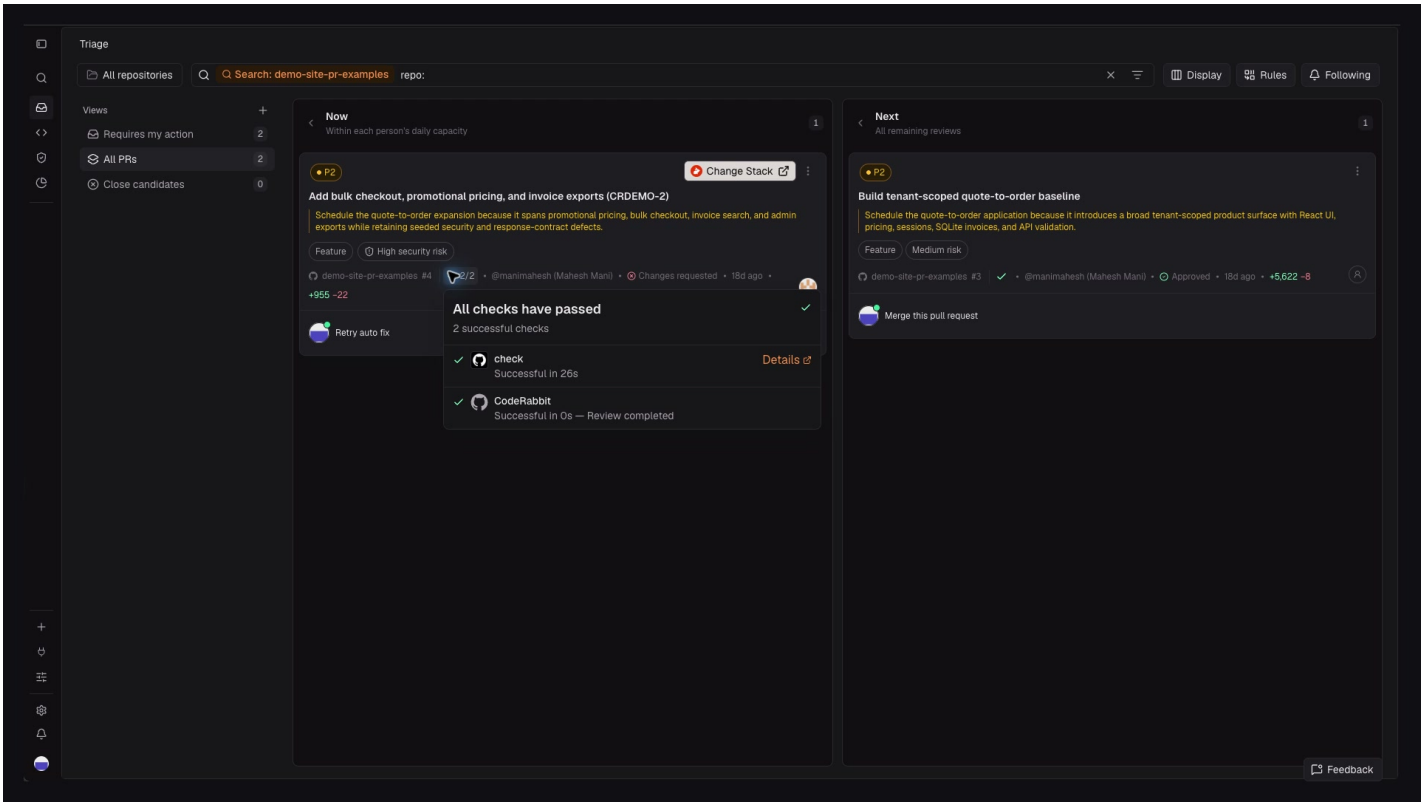

Hover the passed-checks indicator to reveal its detail.

Read passing checks alongside Changes requested, then dismiss the popover.

SAY

I also check its current status. This card shows passed checks and requests for changes. Passing checks are useful but the review still raises questions about the application's behavior.

SEE / VIDEO FRAME AT 02:42

ACT FROM CARD / STEP 3 OF 3 / 02:46-02:58

Open the detailed review

DO

Click Review this pull request in Change Stack. Switch to the new tab.

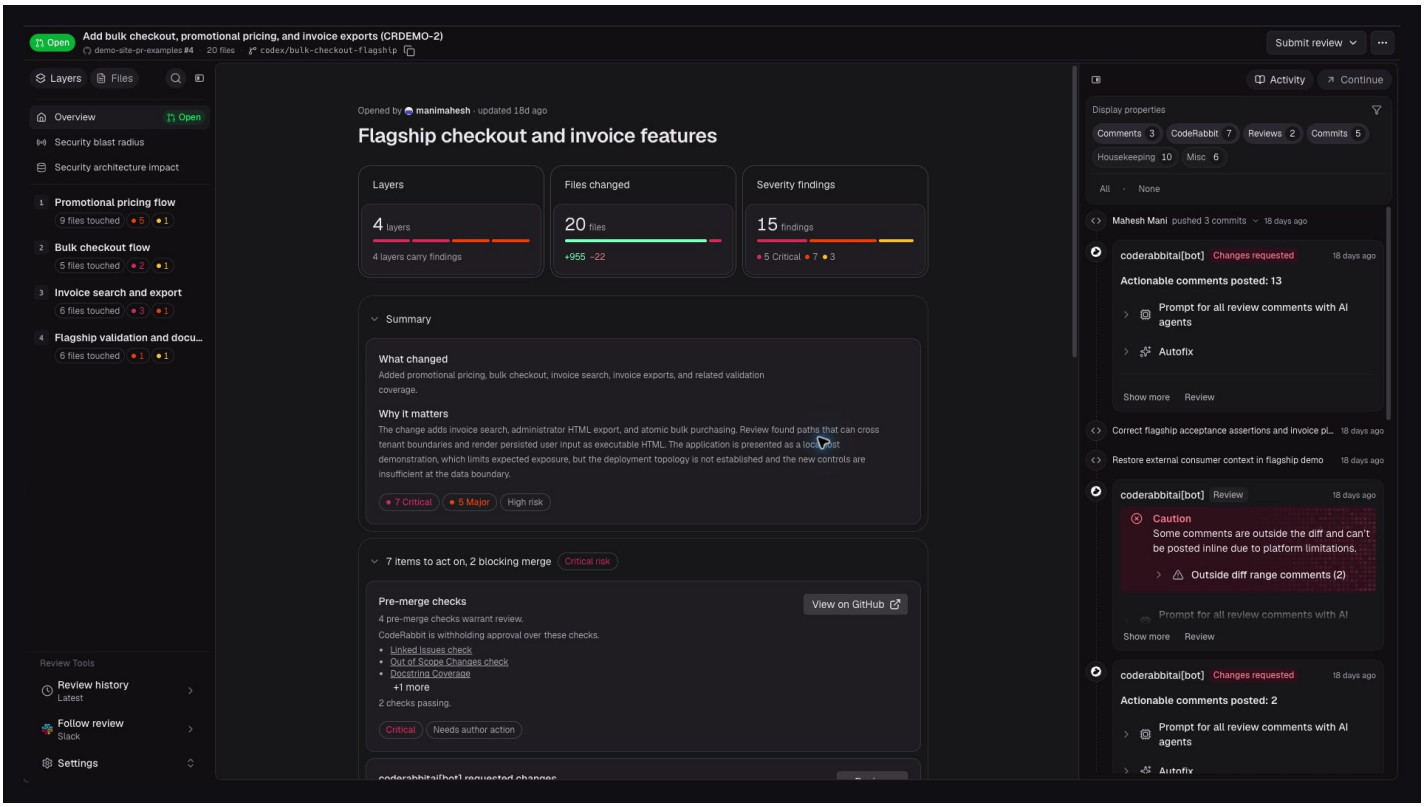

Confirm PR #4 and the Overview screen.

PR #4: Change Stack

SAY

In this example, I want to read the code and findings before requesting a repair. I follow the Change Stack link to open the detailed review. That takes me from choosing a pull request to investigating the change itself.

SEE / VIDEO FRAME AT 02:56

QUEUE TO YOU / STEP 1 OF 4 / 02:59-03:06

Open the digest example

DO

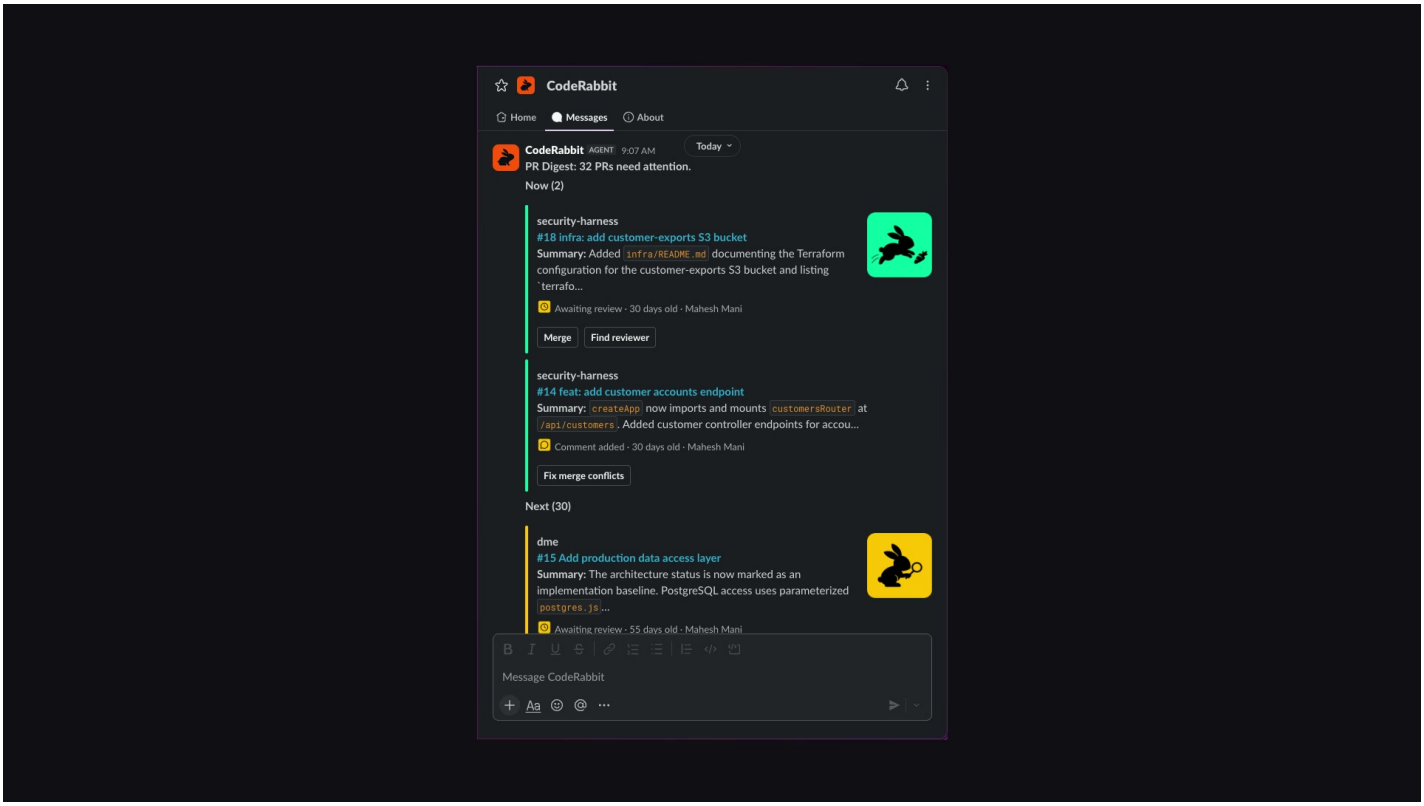

Switch to Slack in Mahesh's connected account. Open the CodeRabbit app under Apps, then Messages.

Show the supplied digest screenshot. Its original message permalink was not recorded.

SAY

The queue can also reach me in Slack. Here is a digest from the author's connected account with examples from other repositories.

SEE / VIDEO FRAME AT 03:05

QUEUE TO YOU / STEP 2 OF 4 / 03:07-03:17

Read Now and Next

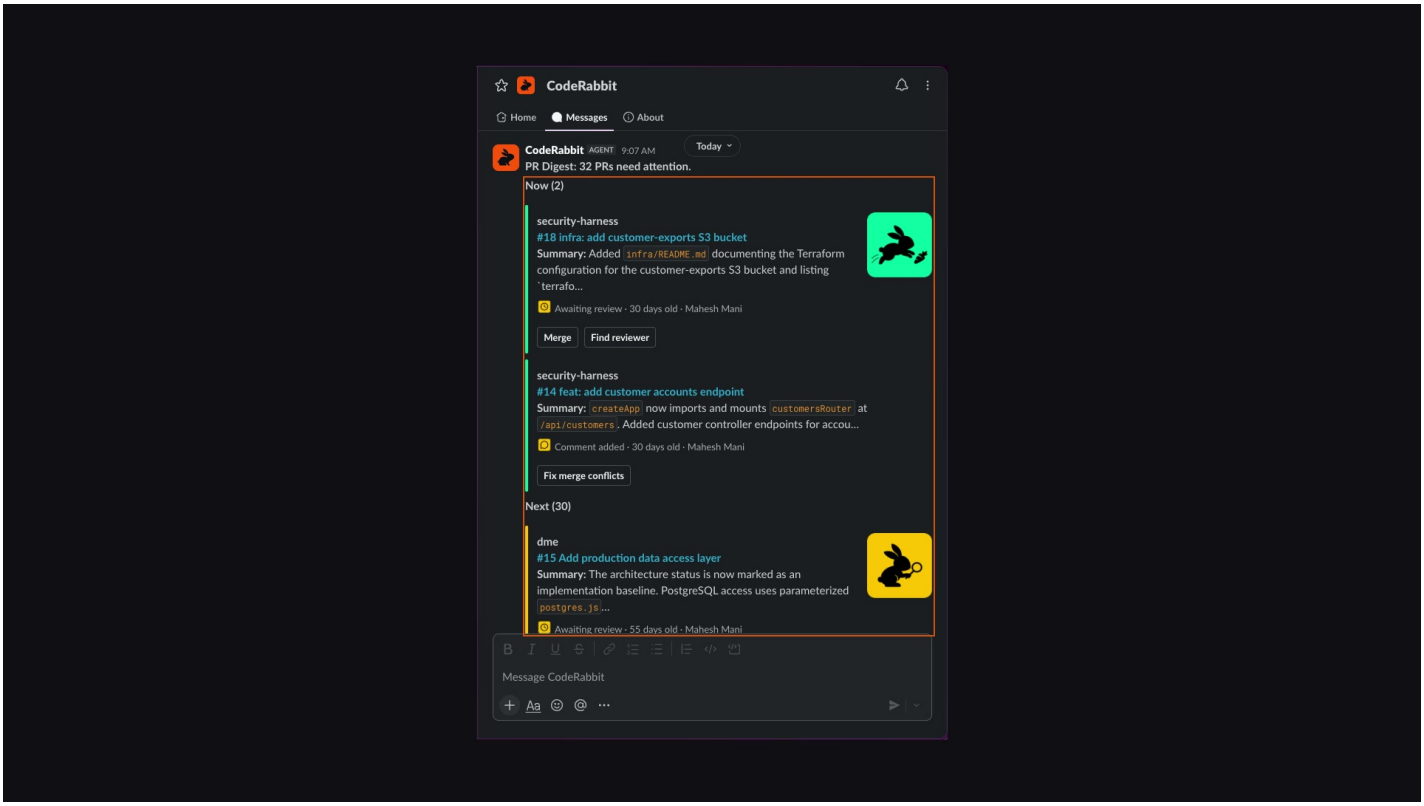

DO

Scroll the digest to show Now, then Next. Read the repository and PR number on each card.

SAY

The message groups work into Now and Next. Each card identifies the repository and pull request, summarizes the change and shows its status.

SEE / VIDEO FRAME AT 03:15

QUEUE TO YOU / STEP 3 OF 4 / 03:18-03:31

Show the digest actions

DO

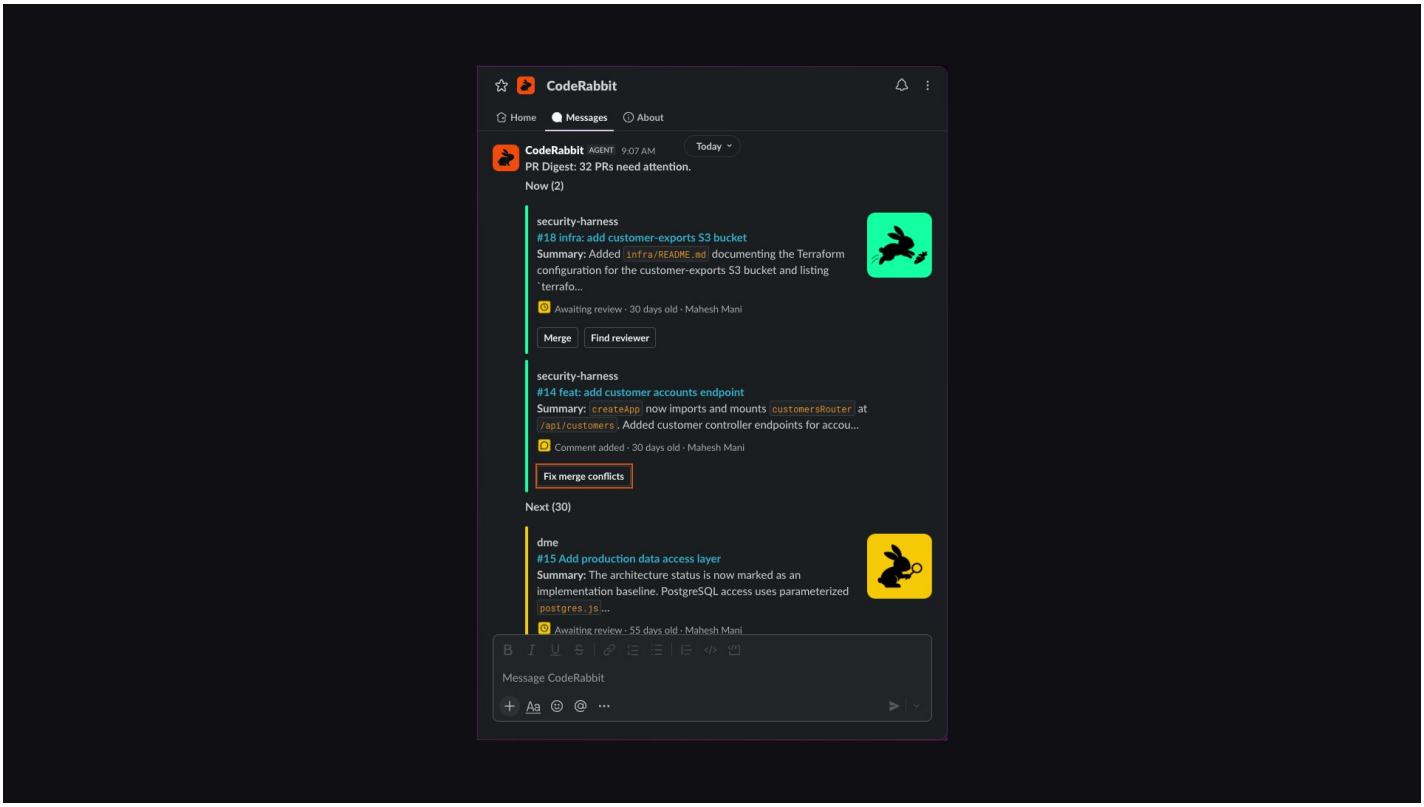

Show Merge and Find reviewer on security-harness #18, then Fix merge conflicts on #14.

Keep these as previews; do not activate them.

SAY

I scroll through the available actions. One card offers Merge and Find reviewer, another offers Fix merge conflicts. Those give the team a starting point for the next step. We still check the review evidence before accepting a change.

SEE / VIDEO FRAME AT 03:28

QUEUE TO YOU / STEP 4 OF 4 / 03:32-03:40

Return to the reviewer card

DO

Switch back to Mike’s Triage tab and search demo-site-pr-examples.

Locate PR #4 and its Change Stack action. Return to the flow slide for the closing hold.

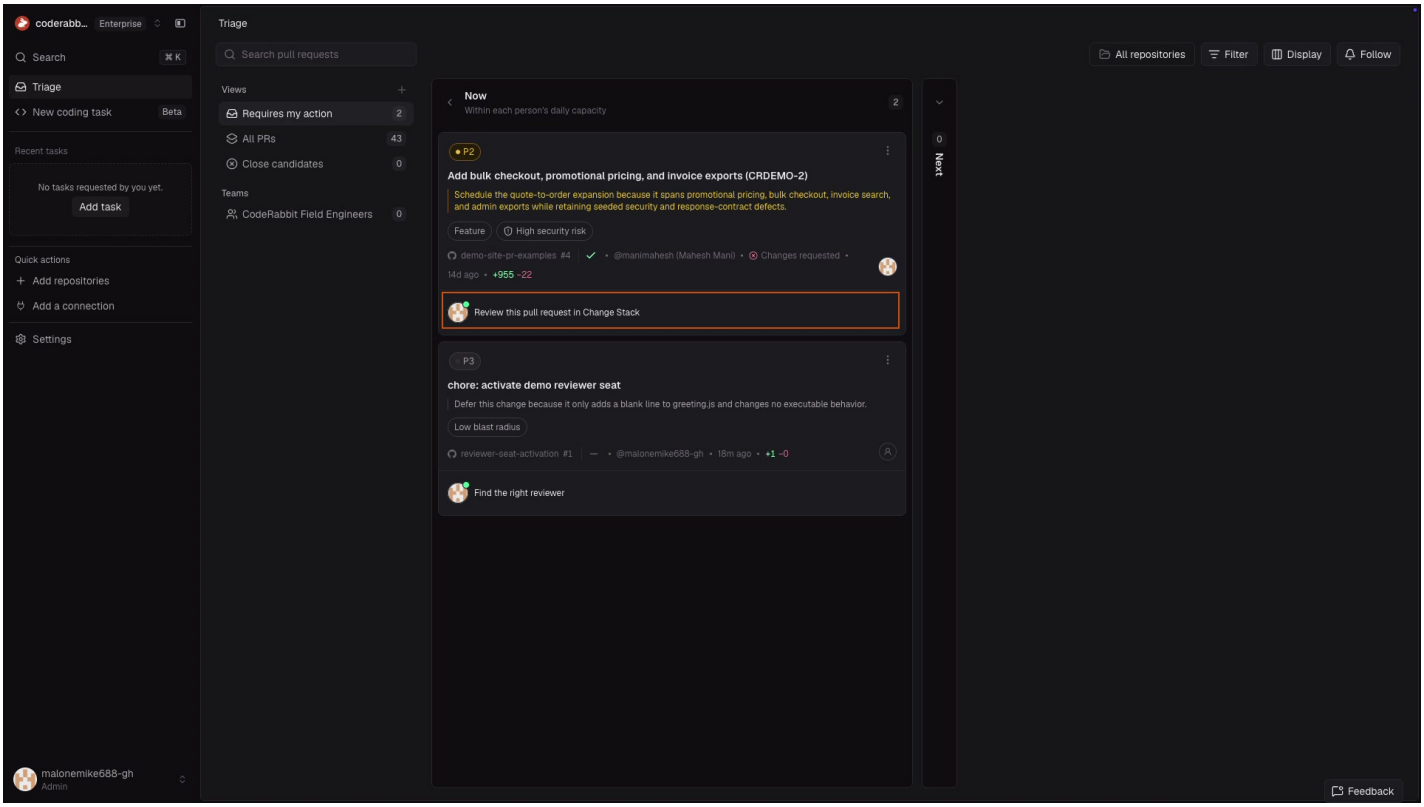

Triage queue

PR #4: Change Stack

SAY

I return to Mike's reviewer account and our checkout and invoice pull request. From this card, we'll continue to Change Stack to examine the code.

SEE / VIDEO FRAME AT 03:38

Resource directory

Links open the recorded examples. Historical comments and pinned source revisions preserve the relevant context when the live PR has moved on.
